SAFETY PRECAUTIONS

- Always remove jewelry and wear eye protection.
- Always use extreme caution when jacking up a vehicle for work. Set emergency brake and use tire blocks. Locate and use the vehicle manufacturers designated lifting points. Use jack stands.
- Always use appropriate and adequate care in lifting components into place.
- Always ensure components will remain secure during installation and operation.
- Always wear safety glasses when installing this kit. A drilling operation will cause flying metal chips. Flying chips can cause serious eye injury.
- Always use extreme caution when drilling a vehicle. Always disconnect power before welding. Thoroughly inspect the area to be drilled (on both sides of material when possible) prior to drilling, and relocate any objects that may be damaged.
- Always use extreme caution when welding a vehicle. Thoroughly inspect the area to be welded (on both sides of material when possible) prior to welding, and relocate any objects that may be a fire hazard. When welding in a cab, make sure the interior surfaces are covered (*e.g.*, welding blanket) and a fire extinguisher is at hand.
- Always use extreme caution when cutting and trimming during fitting.
- Always tighten all nuts and bolts securely per installation instructions.
- Always route electrical cables carefully. Avoid moving parts, components that become hot, and rough or sharp edges.
- Always insulate and protect all exposed wiring and electrical terminals.
- Perform regular inspections and maintenance on mounts and hardware.
- Tire may rub at max turn or articulation.

.....

Injury hazard

.....

Failure to observe these instructions could lead to severe injury or death.

3. Its recommended that you chase the three welded-in projection nuts with a tap to help reduce the risk of seized hardware. Furthermore, it is recommended to use anti-seize when using stainless steel bolts on steel nuts.

4. With the help of a friend, position the inner fender up to the surface of the JL fender system. Be careful not to scuff the finish of either product. As shown in Fig 3.

Fig. 3

5. Install the three stainless steel button-head bolts with rubber bonded washers, **only hand tight**.

6. Using either a ratchet or powered driver, align the inner fender front mounting hole with the front body mount bracket hole that was drilled out in step 1 and drive the included self-tapping bolt into the body mount hole. As shown in fig 4.

Caution: Don't apply too much torque with impact driver on the self-tapper as you could strip out the threads.

Fig. 4

7. Fully tighten all remaining hardware.
8. Repeat the process on the other side.
9. Installation has been completed.
