SAFETY

Your safety and the safety of others is very important.

- In order to help you make informed decisions about safety, we have provided installation instructions and other information.
- These instructions alert you to potential hazards that could hurt you or others.
- Please do a job safety analysis (JSA) before each task to identify potential hazards for your situation and remove/protect against them.
- You must use your own good judgment, and take your time.

Read and understand all safety precautions and instructions before installing this product.

THIS PRODUCT IS FOR OFFROAD USE ONLY. ALL LIABILITY FOR INSTALLATION AND USE RESTS WITH THE OWNER.

CARELESS INSTALLATION AND OPERATION CAN RESULT IN SERIOUS INJURY OR EQUIPMENT DAMAGE.

Injury hazard

Failure to observe these instructions could lead to severe injury or death.

- Always** remove jewelry and wear eye protection.
- Always** use extreme caution when jacking up a vehicle for work. Set emergency brake and use tire blocks. Locate and use the vehicle manufacturers designated lifting points. Use jack stands.
- Always** use appropriate and adequate care in lifting components into place.
- Always** insure components will remain secure during installation and operation.
- Always** wear safety glasses when installing this kit. A drilling operation will cause flying metal chips. Flying chips can cause serious eye injury.
- Always** use extreme caution when drilling on a vehicle. Thoroughly inspect the area to be drilled (on both sides of material) prior to drilling, and relocate any objects that may be damaged.
- Always** use extreme caution when cutting and trimming during fitting.
- Always** tighten all nuts and bolts securely per installation instructions.
- Always** route electrical cables carefully. Avoid moving parts, components that become hot and rough or sharp edges.
- Always** insulate and protect all exposed wiring and electrical terminals.
- Always** perform regular inspections and maintenance on mounts and related hardware.

II. Tools Required

- 13mm, 9/16," 5/8," 11/16," 3/4" Wrenches and sockets
- Socket wrench and short extension
- Channel-lock pliers

III. Vehicle Preparation

A. Cut wires to the 3rd brake light leaving enough excess wire for future connections. Tape over the ends of the wires to not allow shorting. Seal vehicle side of the wire harness and secure.

B. Remove the bolts holding the OEM spare tire carrier to rear gate. Support tire carrier such that it does not fall when bolts are removed.

IV. Tire Carrier Installation

A. Attach replacement door plate and rubber stops using a 13mm socket and the 8 provided bolts/washers. Note that the bolts that pass through the rubber stops require the 4 provided spacers.

B. Install pivot shaft using a 9/16" socket or wrench and the provided 3/8" bolt and washer. Do NOT over tighten or use an impact.

E. Install one of the Thrust Washers onto the shaft with the greased perforated side facing down onto the bumpers top face. Then slide the Tire Carrier Assembly gently onto the shaft to prevent damage to the bearings. Next place the remaining Thrust Washer on the top of the Pivot Housing with the greased perforated side facing up.

F. Position the Tire Carrier Pivot Upper Bracket over the remaining portion of the Pivot Shaft inserting the last remaining 3/8"-24 Bolt and washer through the top of the mount and into the shaft. Position the bracket to allow the four 7/16-14x1" bolts and washers to be inserted through the bracket and into the bumper as shown below. Use a 9/16" socket for the 3/8" bolt and a 5/8" socket for the 7/16" bolts.

Product Number: Y1261T

07-Current Jeep JK with the Fab Fours JK Rear Replacement Bumper

I. Install your spare tire on the tire carrier.

J. With the added weight of the tire in place, adjust the tube assembly up or down so that it goes smoothly into place on the rubber stops on the back of the door.

K. Adjust the turnbuckle (lengthen or shorten) so that the door is held firmly in place when the door is closed. As a good guide, there should be enough pressure to open the door 2-3" when the handle is pressed and the pressure is released.
