Step 1. Find both the driver and passenger side steps.
Note: The forward steps on each side will be furthest from the end of the main tube.

Step 2. Hold the passenger side step brackets against the pinch weld. One hole in each bracket will line up with an existing hole on the pinch weld. Mark the remaining holes with a marker.

Step 3. Drill the marked holes with a 1/4" drill bit.

Step 4. Using the supplied bolts, install the step bar starting with the bolts in the pinch weld, and then install the larger bolts on the underside of the vehicle using the threaded clips provided.

Step 5. Repeat this process for the driver's side of the vehicle.
