3. It is not necessary to remove the grill from the vehicle but doing so will allow for additional space to install the headlight. If removing, detach the blinker wire from the grille and set grille aside. **See Photo 3.**
4. Using a T-15 torx head bit remove the headlight ring. **See Photo 4.** Retain the hardware for reuse.

5. Unplug the headlight and remove the headlight from the vehicle. **See Photo 5.**
6. If factory plug differs from the LED headlight plug, use the supplied H13 to H4 adaptor. Position the new LED headlight in the headlight bucket paying close attention to the clocking of the headlight. Logo at top and tabs on headlight will position as the factory headlight.
7. Re-install the factory trim ring and secure with the factory hardware. Tighten using a T15 torx head bit. **See Photo 6.**

8. Reinstall the blinkers in the grill if removed and reinstall the grill making sure the grill clips engage in the stock locations. **See Photo 7.**
9. Reinstall the plastic retainer pins on the top of the grill.
